

Circulants.

Chapter 1. Circulants . . . . .	1
The Circulant Diagonalization Theorem . . . . .	3
Circulant vectors. . . . .	6
Standard Bases for Circulant Space and Eigenspace. . . . .	8
The Representer Polynomial . . . . .	9
The Circulant Determinant . . . . .	10
Chapter 2. Circulant Matrices . . . . .	12
The Centralizer of the Circulant Matrices. . . . .	12
The Shift-circulant or $s$ -circulant Matrices . . . . .	13
Normalizer of $\text{CIRC}_N$ . . . . .	15
The Linear Automorphisms of $\text{CIRC}_N(R_\zeta)$ . . . . .	18
The Linear Automorphisms of $\text{CIRC}_N(\mathbb{R})$ . . . . .	20
The Galois Group and Linear Automorphism of $\text{CIRC}_N(R)$ . . . . .	21
Chapter 3. Homomorphisms . . . . .	22
$\delta$ -Idempotents . . . . .	22
The Circulant Decomposition Theorem . . . . .	28
The Polynomial Wrap-Around Map, $\Gamma^N$ . . . . .	30
Homomorphisms to Cyclotomic Fields . . . . .	31
The Homomorphisms $\Gamma_r^s$ . . . . .	33
Restatement of the Circulant Decomposition Theorem . . . . .	35
Cyclic Group Rings . . . . .	38
The Position Multiplier Maps . . . . .	40
Chapter 4. The Supercirculants, $\mathbf{circ}_\infty$ . . . . .	43
Supercirculant Endomorphisms . . . . .	45
Supercirculant Eigenvalues . . . . .	46
The Inverse Transform, $\lambda^{-1}$ . . . . .	47
Chapter 5. Two Circulant Subalgebras . . . . .	49
The Residue Class Matrices . . . . .	49
Application to Arithmetic Partitions . . . . .	52
Subrepeating Circulant Matrices . . . . .	55
Decomposition of Subrepeating Circulants . . . . .	56
Eigenvalue Decomposition of Subrepeating Circulants . . . . .	57
Determinant Decomposition of Subrepeating Circulants . . . . .	58
Chapter 6. Tensor Products . . . . .	60
General Tensor Products of Circulant Matrices . . . . .	61
Tensors of Supercirculants . . . . .	63
Tensors Products and Polynomials in Several Variables . . . . .	64
Chapter 7. Circulant Rings over the Integers and the Rationals . . . . .	66
Introduction: The Group of Units in $\mathbf{circ}_N(\mathbb{Z})$ . . . . .	66
Circulant and Cyclotomic Units of Finite Order . . . . .	69
The Rational Circulants of Finite Order . . . . .	73
Elements of Infinite Order in $\mathbf{U}(\mathbf{circ}_N(\mathbb{Z}))$ . . . . .	75
A Theorem of G. Higman . . . . .	75
Dirichlet's Unit Theorem . . . . .	76
Kummer's Theorem and Cyclotomic Units . . . . .	76
Bass Units and the Theorem of H. Bass . . . . .	77
Fundamental Units for $\mathcal{U}_p$ . . . . .	77
Conclusions For The Prime Order Case . . . . .	83

Prime Power Case . . . . .	83
Decomposition of the Circulant Units . . . . .	87
Chapter 8. Irreducibles, Primes, and Ideals of $\mathbf{circ}_N(\mathbb{Z})$ . . . . .	92
General Results . . . . .	92
The Hilbert Basis Theorem . . . . .	93
A Circulant Norm . . . . .	93
Irreducibles . . . . .	94
Primes . . . . .	96
Factorizations . . . . .	100
Non-unique Factorization in $\mathbf{circ}_p(\mathbb{Z})$ . . . . .	100
Chapter 9. Application: Diffusion in Toroidal Spaces . . . . .	103
Diffusion of Matter . . . . .	103
Transitions Between States . . . . .	104
Circulant Matrix Model . . . . .	104
Boolean Circulants . . . . .	107
Higher-dimensional Tori . . . . .	109
Relaxation of the Assumptions . . . . .	110
Chapter 10. Formulæ for the Circulant Determinant . . . . .	111
Homogenous Diophantine Equations . . . . .	113
Fermat's Last Theorem . . . . .	114
The Theorem of Sophie Germain . . . . .	115
Wendt's Circulant . . . . .	116
Formulæ for the Determinantal Coefficients . . . . .	119
Phase Formula . . . . .	120
Parity Formula . . . . .	121
Upper-Bounds on $ \Delta(a) $ . . . . .	123
Chapter 11. Formula for Determinantal Coefficients . . . . .	126
Notation of the Main Theorem . . . . .	126
Statement of the Main Theorem . . . . .	126
The Zero Set Formula . . . . .	127
Ore's Proof of the Zero Set Formula . . . . .	128
Criticism of Ore's Proof . . . . .	130
New Proof of the Zero Set Formula . . . . .	131
An Algorithm for Calculating the Determinantal Coefficients . . . . .	134
Zero Set Formula . . . . .	137
Multiset Formula . . . . .	138
Power Formula . . . . .	139
Application to Permutations . . . . .	139
Application to Cyclotomic Norms . . . . .	140
Application to Combinatorics I . . . . .	141
Application to Combinatorics II . . . . .	142
The EGZ Theorem . . . . .	143
Chapter 12. Circulants over Finite Fields . . . . .	145
Appendix A. Basic Cyclotomic Theory . . . . .	146
Cyclotomic Extensions . . . . .	146
Cyclotomic Polynomials . . . . .	146
The Galois Group . . . . .	147
Vector Space Basis . . . . .	147
Cyclotomic Norm . . . . .	147

Integral Elements . . . . . 148  
Appendix B. The Cooley-Tukey Fast Fourier Transform . . . . . 149  
Glossary of Terms . . . . . 152  
Notes and References . . . . . 155
